

WELCOME TO

Nanotech-2018

Martin Ntwaeaborwa

University of the Witwatersrand, South Africa

On behalf of the organizing committee and many individuals who have worked tirelessly to organize the 30th annual congress on Nanotechnology and Nanomaterials (Nanotech 2018), it is my pleasure to welcome you to Stockholm (The capital of Sweden and the most populous city in the Nordic countries). The theme of Nanotech 2018 is Modern Solutions for a Healthier Planet. In order to realize this theme, the focused topics featuring in the programme are Cancer Nanotechnology, Nano medicine, Nano toxicology, Nano photonics and Optics, Nano pharmaceutical, etc.

We are excited about your participation and your technical contribution to help us realize and bring this theme to life. We are fortunate to have a line-up of the most influential scientists from different countries across the globe to give plenary lectures on topics related to front line areas of nanoscience and nanotechnology.

We strongly encourage you to take the time to visit exhibition booths, where our sponsors are showcasing their latest technology that makes cutting edge science and the latest applications possible.

We would like to thank you all, without exception, for your participation and contribution to the programme. In a very special way, I would to extend my gratitude to all members of the organizing committee who have invested many hours of work to make Nanotech 2018 a success. Please enjoy the exciting technical presentations and the opportunities for stimulating interactions and networking. We look forward to your continued participation and contribution to our future congresses. Please enjoy the hospitality of the conference venue, Quality Hotel Globe, and the city of Stockholm.
